

C. of C. Secretary Tells the Why and Wherefore of Ogden

Requests for the answers to a series of questions published by the Standard-Examiner last Sunday have been received. They were turned over to Secretary O. J. Stilwell of the Ogden Chamber of Commerce through whose courtesy answers to the first section are herewith presented. Answers for the other sections will appear in coming issues.

The questions and answers concern the history of Ogden. They follow.

Editor Standard-Examiner:
You ask for answers to questions appearing in your last Sunday's issue, quoting the old saw, "Any fool can ask questions but it takes a wise man to answer them."

In presenting an outline to fourth grade teachers for teaching local geography, I answered questions in section "A" and "B" and should have answered "C" and "D" if time had permitted; but most of the points brought out in the other sections are obvious to any thinking person, or are matters of statistics which the teacher can easily obtain.

A-1—Why did people first settle here?

Answer: Farm lands.
In 1841 Miles Goodyear established a post here for trading with the Indians; but the first real settlers were the Mormons who came from Salt Lake in 1847, attracted by the excellent soil for farming purposes, and the possibility of easily getting irrigation water into the lands, along the bottom lands at the north of Ogden river, and from four creeks between Ogden and North Ogden called one-mile, two-mile and three-mile and four-mile creeks.

A-2—What caused the early growth of the town?

Answer: Commerce.

Trade continued with the Indians for some time. The farmers prospered and developed considerable local trade. Gold seekers on their way to California helped to build up a primitive commerce.

FIRST BRICK BUILDING
For many years it was not settled, which would become the prin-

cipal town, Ogden or North Ogden. Sidney Stevens, founder of the Sidney Stevens Implement Co., commenced business in North Ogden and there erected the first brick building in the territory of Utah. This building was partially destroyed by fire; but the restored portion is still in use by J. E. Marshall as a store.

A-3—Why did it later become a city?

Answer: Railroads.

The arrival of the railway in 1869 doubled the average price of everything produced here and lowered the price of what had to be imported, thus causing commerce to flow to Ogden from a much greater area.

Local capital was willing to make permanent investment and eastern men of means came with money. The railway distributed much money in payrolls.

A-4—Will Ogden continue to grow?

Yes, Ogden will continue to grow for the great factories recently acquired will employ much labor and have laid the foundation for a growth of several thousand people.

A-5—Ogden is pre-eminent in the intermountain country as chief railway center because the only mountain pass through which a railway enters this valley is via Weber canyon, and Ogden stands on a fertile delta at the western end of this pass. There is no other eastern outlet to the valley without going around the end of the Wasatch range, more than 150 miles north or 200 miles south. People and goods must first come to Ogden in order to get east quickly because there is no other direct route, also traffic north, west and south for a considerable distance must come to or go through Ogden.

CANNING CENTER

A-5b—Ogden is pre-eminent in the intermountain country as chief canning center. On account of unrivalled transportation facilities, its enterprising men, favorable climate and the adaptable soil of the surrounding delta.

The tomatoes grow on this delta are meaty and firm in texture and deeply and richly colored; in fact so highly colored that carloads of gallon cases of the product are shipped to be used as a coloring matter for the catsup of the great eastern factories.

In order to make money a canning factory must have a large and sure supply of some staple crop. Ogden factories have two—tomatoes and peas. Canning factories in surrounding states have failed because of the inferior or inadequate supply of tomatoes.

A-5c—Ogden is pre-eminent in the intermountain country as chief livestock center. Because the greater portion of the livestock grown in the West is consumed in the East and all stock must come to Ogden to be shipped East.

Of late extensive stockyards have been installed for the economic sale and handling of stock and the Ogden Packing & Provision Co., the largest plant of its kind between the Missouri river and the Pacific coast, purchases great quantities of stock which it prepares for the home and foreign market.

A-5d—Ogden is pre-eminent in the intermountain country as chief milling center almost solely on account of transportation facilities. Little wheat is grown in Utah south of Ogden. Millions of bushels are grown north of Ogden. If instead of being in Ogden the great storage plants were in Salt Lake City, Idaho wheat would go through Ogden to Salt Lake City and return in order

to go east or west, entailing an immense loss in time and freight.

A-5e—Ogden is pre-eminent in the intermountain country as chief fruit shipping center, also, almost solely on account of speedy transportation to market. Brigham City, Provo and Ogden are the centers of great fruit producing sections; but only Ogden can ship it out quickly, and fruit must be shipped immediately or spoil.

A-6—Ogden is pre-eminent as a food manufacturing center. For four principal reasons: Transportation facilities; the excellent agricultural products of the surrounding country; Ogden's splendid body of energetic men; and the effective work of the Ogden Chamber of Commerce.

AGRICULTURAL CENTER

A-6a—Ogden is pre-eminent as an agricultural center—For six principal reasons: The fertility of the soil; favorable climate; water for irrigation; the industry of the natives; transportation facilities; and the best market for farm crops in the West.

A-6a—Salt Lake City is pre-eminent as the financial center of the intermountain country—Because it is the largest city, because it has most wealthy men; because its bankers handle the money of the state and of the dominant church; because the financing of great mining operations are centered here and its superior hotels and stores attract outside money.

A-6b—Salt Lake City is pre-eminent as a mining center—Because the greater number of people who visit Salt Lake on account of the hotels, its conferences, conventions and legislative activities—the jobbers prefer to be where the greatest number of people will see their wares.

A-6c—Salt Lake City is pre-eminent as a mining center—Because the mines are east, south and west of Salt Lake City and not north.

A-6d—Salt Lake City is pre-eminent as a political center because it is the capital of the state, the legislature meets there and all principal state officials live there.

Salt Lake is pre-eminent as an ecclesiastical center because the Temple, Tabernacle and offices of the church are in Salt Lake City and the president and the high officials live there.

TOURIST CENTER

Salt Lake is pre-eminent as a tourist center on account of the notoriety given to the Mormon religion on account of the missionaries constantly kept out, on account of the old fight on polygamy, on account of the fame of the Temple and Tabernacle. Salt Lake City is perhaps the most widely known city of its size in the world. Tourists are out to see noted places and things.

A-7—All other Utah towns are smaller than Ogden and Salt Lake City because no other city can become equal to Ogden without equally good transportation facilities. No other Utah town can become equal to Salt Lake without obtaining the things above mentioned in which Salt Lake City is pre-eminent.

O. J. STILWELL,
Secretary Ogden Chamber of Commerce.

UTAH CANNERS WILL GO EAST

H. L. Herrington and James Anderson to Attend Convention

H. L. Herrington, vice president of the Utah Cannery Association, accompanied by James Anderson of Morgan, a director in the National Cannery Association, will depart for the east today, where they will attend sessions of representatives of the canning industry at Chicago.

At Chicago the two men will attend the meeting of the Western Cannery Association, which will bring together hundreds of representatives of the various canning companies in the western states. Several important problems will be discussed at this session, according to Vice President Herrington.

Plans for the 1921 season in all of the factories of the United States, crop outlooks and other business will be completed at the meeting, according to Mr. Herrington.

Following the meeting with the Western Cannery Association, the two men will attend a three-day session of the educational committee to be held at Chicago. This session will be held November 18, 19 and 20. Publicity will be one of the phases to be discussed at this meeting.

SALTS FINE FOR ACHING KIDNEYS

We eat too much meat which clogs Kidneys, then the Back hurts

Most folks forget that the kidneys, like the bowels, get sluggish and clogged and need flushing occasionally, else we have backache and dull misery in the kidney region, severe headaches, rheumatic twinges, torpid liver, acid stomach, sleeplessness and all sorts of bladder disorders.

You simply must keep your kidneys active and clean, and the moment you feel an ache or pain in the kidney region, get about four ounces of Jad Salts from any good drug store here, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and is harmless to those clogged kidneys and stimulate them to normal activity. It also neutralizes the acids in the urine so it no longer irritates, thus ending bladder disorders.

Jad Salts is harmless; inexpensive; makes a delightful effervescent lithia-water drink which everybody should take now and then to keep their kidneys clean, thus avoiding serious complications.

A well known local druggist says he sells lots of Jad Salts to folks who believe it cures aching kidney trouble while it is only trouble.—Advertiser.

ALHAMBRA

UTAH'S FINEST THEATRE

HE'S HERE AT LAST!

Looming as big as the West! "Fatty" Arbuckle in "The Round Up"

The story universally known as the greatest Western stage success ever enjoyed by Americans.

With its struggle of savage and white, romance of gold, grit of the pioneer, loyalty, deviltry, daring, love.

Now for the first time filmed 'mid the valleys and crags of the everlasting ranges.

From the Play by

EDMUND DAY

A Paramount Picture

Jesse Lasky presents

A GEORGE MELFORD PRODUCTION

ROSCOE (FATTY) ARBUCKLE

(By Arrangement with Joseph M. Schenck)

"The Round Up"

HIS FIRST SEVEN REEL FEATURE PRODUCTION

Admirers of Roscoe Arbuckle, the big, good-natured comedian who won fame in Paramount-Arbuckle comedies, will be interested to learn that he is now a Paramount star in feature pictures, his first appearance being as the fat Sheriff known as "Slim" Hoover, in George Melford's production of "The Round Up," which will be shown at this theater tonight for the first time.

Mr. Arbuckle proves in this picture that he can do serious mimetic work as well as slap stick comedy. His role in "The Round Up" is one that calls for the best dramatic work of

which Mr. Arbuckle is capable, but he acquits himself with artistic success. It is a fitting debut of the comedian in feature pictures and much may be expected from him in the same line in future.

As a stage success, "The Round Up" proved a premier attraction and its picturization with Mr. Arbuckle in the stellar role promises to be no less popular. The story is dramatic and thrilling, the various roles are portrayed by artists and the photography is excellent. You should not overlook this sterling picture.

Men's Organization of M. E. Church Meets

There was a good attendance at the opening meeting of the Methodist Brotherhood in the First M. E. church on Tuesday evening, last. A substantial dinner was prepared by the Ladies' Aid society, after partaking of which, the men were addressed by Mayor Frank Francis, who gave a graphic and humorous description of the everyday problems and incidents to be found in the life of the chief executive of a modern city.

The occasion, too, was seized upon by the men to give a welcome to their new pastor, the Rev. Hugh Neville of Iowa. In his response, Mr. Neville, pledged the hearty support of the brotherhood to the Mayor in every project tending to the welfare of the city and community. C. M. Wilton led the community singing. He also sang.

The brotherhood will meet regularly throughout the winter on the first Tuesday evening of each month.

It has been found that four human hairs will sustain a one-pound weight.

Call for Firemen Causes Commotion

With bells clanging and with fire ladders hanging to speeding trucks, the Ogden fire department tore down Twenty-fifth street yesterday morning responding to a call that the Healy hotel was on fire.

Autos and wagons quickly pulled to one side to keep from being smashed. Street cars stopped in their tracks and pedestrians craned their necks and then started running after the trucks.

At the hotel all was serene. No one seemed to be aware that there was a fire. A few occupants of the lobby registered fright. More expressed amusement. This feeling became unamused when a party burned wooden paper basket was found on Wall avenue, just west of the hotel.

Some one had thrown a cigarette butt into the basket, lighting it. They then apparently hurled the basket from a window and sent in a call for the fire department.

14th Ward Deacons to Conduct Meetings

The deacons of the Fourteenth ward will have charge of the sacrament meeting this evening. Addresses will be delivered by M. C. Woods and E. A. Larkin. Musical selections will be rendered by Miss Carrie Owens and Miss Royal.

High Priests Will Meet at Second Ward

The regular monthly quorum meeting of the high priests of the Weber stake will be held in the Second ward chapel this afternoon at 1 o'clock. The regular stake priesthood meeting of the Weber stake will be held in the Second ward chapel this afternoon at 2 o'clock. A full attendance of members is desired.

Turn More Feed Into Pork
Worms prevent growth and waste feed. Expel the worms with
Dr. LeGear's Hog Prescription
It also tones up the entire system, is an appetizer, blood purifier, invigorator. Used by thousands. Get a package from your dealer today.

Watch the Cream Line

When you buy milk, you get it for the real food value it contains.

The higher percentage of cream, the more it is worth to your family.

KLEENMILK is known for its noticeable cream line—but it costs no more. It's the milk you should use.
